

RecyClass

LETTER OF COMPATIBILITY DESIGN FOR RECYCLING

Circpack assessed the recyclability of the semi-finished-product described underneath. A semi-finished packaging is the packaging's body or one of its main components (e.g. dispenser, closure system) without all its final elements (e.g. barrier, labels, artwork, etc). The analysis was done conform to the RecyClass Recyclability Methodology (3.0) and the Design for Recycling Guidelines (January 2025). Based on the results of our judgement we are confident to grant you this letter of compatibility. Please be aware that changes in design, print, used materials and/or the effect of product-content or residue, might change the outcome of the assessment of a final packaging. We advise you to have the final/complete product packaging certified.

GRANTED TO:

Oerlemans Plastics BV
Industrieweg 7
4283 GX - Giessen
Netherlands

PACKAGING:

OPTILAYER BX RTR
Film
PE flexible

RESULT

We confirm that the semi-finished product we have assessed, is compatible with readily available sorting & recycling technologies commonly used at industrial scale in the recycling sector in Europe. As an intermediate result, we have established that this semi-finished product is sorted into the PE films-fraction.

THE RECYCLASS RECYCLABILITY OF THIS SEMI-FINISHED PRODUCT IS CALCULATED AS CLASS B.

DISCLAIMER

At this stage, the use of the RecyClass recyclability certification mark is prohibited. For semi-finished packaging, RecyClass supports business-to-business claims, while the use of a certification mark or business-to-consumer claims about semi-finished packaging are not supported. To use the RecyClass recyclability certification mark, you must submit the final packaging for certification, as it is the final packaging (including its decorative elements and product residue) that will enter the recycling system. This letter of compatibility is valid until 21/04/2028, three years after the release of the audit report.

Audit Report and Certificate Code:
