horticulture

APPLICATION

- ◆ Substrate Cultivation
- ◆ Strawberries
- ◆ Other Greenhouse Cultivations

CO₂-TUBE

CO₂ is one of the most important fertilizers in horticulture, and dosing CO₂ has been an increasing point of attention. Much investment is made in order to create the best possible dosing system, with distribution pipes and ventilators. Much time and money is also spent on improving CO₂ distribution. A high-quality CO₂ tube is therefore a must! That's why there are many options in different punching distances, punches, widths and lengths. CO₂ tubes with suspension strips in 94 and 120 mm are available to.

For optimal CO₂ dosing
in the greenhouse

Provides more growth
through better photo-
synthesis

CO₂-TUBE

TECHNICAL SPECIFICATIONS

Material	Low Density Polyethylene (LDPE) film (HDPE optional)
Colour	Transparent, black, any other colors optional.
Version	Perforated tube on the roll
Width	Standard, 65, 94, 120 mm, other widths on request
Thickness	80 mu, other thicknesses on request
Length	Standard 500 m, other lengths on request
Perforation distance	Standard perforation 15, 20, 25, 30, 40, 50, 60, 80, 100 en 120 cm, other perforation on request
Perforation	1- of 2-sides perforated, standard is 2-sides (square perforated) with diameter 0,8 mm
Certificaten	BRCGS, ISO14001, ISO26000

Oerlemans Plastics is the producer in the field of plastic plastics. With 34 mono and co-extruders we produce film in the qualities LDPE, MDPE, LLDPE and HDPE. We are constantly developing new film and plastics concepts for horticulture, food, non-food and plastics wholesale. These products are consumed in more than 30 countries. The customer, quality and profitable end result are at the heart of every solution. Our in-house logistics enable us to offer optimum service.

Oerlemans Plastics is a subsidiary of Oerlemans Packaging. Together with the other companies we can offer you a suitable solution!

ADVICE

Are you searching for a specific solution with which you can cultivate a good yield and that has an excellent level of processability? Oerlemans Plastics is the specialist in the production of agricultural and horticultural film. Feel free to contact us!
