APPLICATION

- ◆ Cucumbers
- ◆ Broccoli

CUCUMBER SHRINK FILM

Cucumber shrink film is immensely useful, not only for the cucumber's shelf life but also in view of hygiene on the shelves, where people tend to grab products and return them. A non-packed cucumber rapidly loses 3.5% of its weight in the first three days after harvesting. A packed cucumber slows down this aging process: it loses only 1.5% of its weight in two weeks! This makes an enormous difference.

Shrink film has even more advantages in addition to a longer shelf life. For example, the burden on the environment caused by the packaging is considerably lower than the environmental burden caused by the cucumber. When a cucumber is discarded, the energy that was used for production is lost. Oerlemans Plastics specializes in making high-quality cucumber shrink film. We work according to a fixed formula, so that you create as little waste as possible when you use our film on your shrinking machine. This results in the lowest costs possible per packed cucumber.

The product has a longer shelf life

It protects the product

Low costs per packaged product

CUCUMBER SHRINK FILM

TECHNICAL SPECIFICATIONS

oerlemansplastics
horticulture

Material	Low Density Polyethylene (LDPE) film
Colour	Transparent, light green
Version	Flat perforated on the roll
Printing	Optional
Width	25 t/m 50 cm, other widths on request
Thickness	Standard: 15, 17, 18, 20 mu, other thicknesses on request
Length	Standard lengths 2500, 2750, 3000, 3300 meter, other lengths on request
Perforation	Standard Micro, other perforations on request
Certificates	BRCGS, ISO14001, ISO26000

Oerlemans Plastics is the producer in the field of plastic plastics. With 34 mono and co-extruders we produce film in the qualities LDPE, MDPE, LLDPE and HDPE. We are constantly developing new film and plastics concepts for horticulture, food, non-food and plastics wholesale. These products are consumed in more than 30 countries. The customer, quality and profitable end result are at the heart of every solution. Our in-house logistics enable us to offer optimum service.

Oerlemans Plastics is a subsidiary of Oerlemans Packaging. Together with the other companies we can offer you a suitable solution!

ADVIES

Are you searching for a specific solution with which you can cultivate a good yield and that has an excellent level of processability? Oerlemans Plastics is the specialist in the production of agricultural and horticultural film. Feel free to contact us!
