horticulture

APPLICATION

- ◆ Substrate cultivation
- ◆ Other greenhouse cultivation

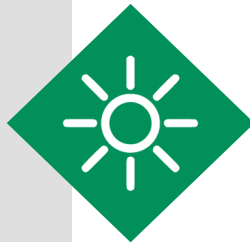

EXTRA-CLEAR FILM

UV-stabilised

save on energy costs

high light
transmission

Saving on energy costs in the cold winter months is a must. An insulating foil is then a good solution for this. For the façade, we have developed extra-clear foil, also called EH foil or screen foil. Using a special recipe, the foil is extra clear, resulting in almost no light loss. The foil is UV-resistant for 1 year in the Netherlands. As a result, we always recommend using an EH film for the façade, rather than the standard transparent foil. This is because the standard transparent film is not UV-stabilised. In addition, it is also possible to perforate the EH foil to size to create any moisture drainage, if this foil is used as a screen foil.

EXTRA-CLEAR FILM

TECHNICAL SPECIFICATIONS

Material	Low-density polyethylene (LDPE) foil with UV
Color	Transparent
Versions	Plano and folded on rolls
Width	Standard widths are 175, 200, 250, 330, 350, 425, 480, 530, 580 and 680 cm, other widths on request
Thickness	Standard thickness: 30 and 50 mu, other thicknesses on request
Length	Custom
Perforation	Optional, 6 mm holes fully customisable
Certificates	BRCGS, ISO14001, ISO26000

Are you looking for flexible plastic packaging or foil? Oerlemans Plastics is the producer in the field of plastic solutions. We are constantly developing new foil and packaging concepts for horticulture, food, non-food and wholesale. Products find their way into more than 30 countries. Customer, quality and profitable end results are at the centre of every solution. Thanks to our own logistics, we know how to offer the best possible service.

The company is part of Oerlemans Packaging Group and cooperates tightly with seven other companies that provide a multitude of flexible foil and packaging solutions.

ADVICE

Are you searching for a specific solution with which you can cultivate a good yield and that has an excellent level of processability? Oerlemans Plastics is the specialist in the production of agricultural and horticultural film. Feel free to contact us!
