OPTILUX CLEAR TUNNEL FILM

high thermal value
under the film

for long-term use

strong material

Tunnel film OPTILUX CLEAR is used to optimize the growth of your plants and crops. This film also protects your crop. The OPTILUX CLEAR is a clear film that let's a lot of light through and offers a thermal effect under the film. As a result, the film maintains the temperature generated during the day at night to create an optimal climate for the plant. The film has a strong quality and is made for long-term use.

OPTILUX CLEAR TUNNEL FILM

TECHNICAL SPECIFICATIONS

| | |
|-----------------------|--|
| Material | LDPE film with AC, EVA, UV |
| Color | Transparent |
| Version | Folded on the roll |
| UV-Resistance | 400Kly, other UV resistance on request |
| Transmission total | Min. 89 % (400-700 Nm) |
| UV Light transmission | Min. 85 % (290-400 Nm) |
| Thermic | 11 % (FIR: 7-14 micron) |
| Width | 6,5, 8, 9, 10, 12, 14,5 meter, other widths on request |
| Thickness | 180 mu, other thickness on request |
| Length | Custom made |
| Certificates | BRCGS, ISO14001, ISO26000 |

Oerlemans Plastics is the producer in the field of plastic plastics. With 34 mono and co-extruders we produce film in the qualities LDPE, MDPE, LLDPE and HDPE. We are constantly developing new film and plastics concepts for horticulture, food, non-food and plastics wholesale. These products are consumed in more than 30 countries. The customer, quality and profitable end result are at the heart of every solution. Our in-house logistics enable us to offer optimum service.

Oerlemans Plastics is a subsidiary of Oerlemans Packaging. Together with the other companies we can offer you a suitable solution!

ADVICE

Are you searching for a specific solution with which you can cultivate a good yield and that has an excellent level of processability? Oerlemans Plastics is the specialist in the production of agricultural and horticultural film. Feel free to contact us!
